

SUMMARY

Software Engineer with 4+ years of experience building enterprise-scale React and .NET applications for large organizations. Specialized in React.js, TypeScript, ASP.NET Core, and modern frontend architecture, with hands-on experience in Nx monorepos, reusable component libraries, Snowflake-backed applications, and performance optimization. Proven ability to deliver end-to-end features, design scalable REST APIs, and collaborate across product, QA, and architecture teams in Agile environments. Passionate about building maintainable, high-performance applications with a strong focus on clean architecture and user experience.

SKILLS

- **Frontend:** React.js, React Native, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Styled Components, Tailwind CSS, Bootstrap
 - **State management & Data fetching:** Redux Toolkit, Redux Thunk, React Query, Axios
 - **Database:** SQL Server, Snowflake, MongoDB
- **Backend:** ASP.NET Core Web API, C#, Node.js, Express.js, RESTful API Development
 - **Cloud & DevOps:** Microsoft Azure, Azure DevOps
 - **Testing:** Jest, React Testing Library (RTL)
 - **AI & Integration:** OpenAI API, OpenAI SDK.
 - **Tools:** Git, GitHub, SonarQube, Agile, Scrum

PROFESSIONAL EXPERIENCE

- Software Engineer, VConstruct, Pune, India**

Aug 2025 – Present

 - Develop and maintain enterprise-scale web applications using React.js, TypeScript, ASP.NET Core, C#, SQL, and Snowflake, delivering scalable solutions for construction management and business-critical operational workflows.
 - Design and implement end-to-end features by building responsive React applications, developing ASP.NET Core REST APIs, and integrating frontend systems with backend services and Snowflake data sources.
 - Contributed to feature design and technical planning by participating in requirement discussions, solution design, sprint planning, backlog refinement, and effort estimation, ensuring scalable and maintainable implementations.
 - Played a key role in migrating frontend applications to an Nx monorepo architecture, improving code sharing, project organization, build consistency, and long-term maintainability across multiple applications.
 - Designed, developed, and maintained reusable Material UI components and shared libraries, establishing consistent UI standards and accelerating feature development across teams.
 - Developed and enhanced ASP.NET Core REST APIs supporting frontend applications, business workflows, and Snowflake-backed reporting solutions.
 - Improved application performance through React rendering optimization, efficient state management, API optimization, and database query improvements, delivering a faster and more responsive user experience.
 - Partnered with QA and product teams to validate features, resolve defects, and ensure successful production releases.
 - Maintained engineering best practices through code reviews, Git workflows, Azure DevOps CI/CD pipelines, automated testing, and SonarQube quality standards.
- System Engineer, Infosys Ltd, Pune, India**

Feb 2022 – Jul 2025

 - Delivered enterprise web and mobile solutions across Fuel Data, E-Commerce, and Rewards platforms, developing reusable UI components, integrating REST APIs, and enhancing application performance for business-critical systems.
 - Designed, developed, and maintained scalable web and mobile applications using React.js, React Native, and TypeScript, building reusable and high-performance UI components.
 - Improved application performance by optimizing rendering, component architecture, and state management strategies, reducing page load times by 25%.
 - Integrated RESTful APIs using React Query and Axios, reducing data fetch times by 40% through efficient caching and synchronization techniques.
 - Implemented scalable state management solutions using Redux Toolkit and Redux Thunk, improving application responsiveness and maintainability.
 - Refactored and modernized legacy codebases, reducing technical debt by 30% while ensuring compliance with SonarQube quality standards and engineering best practices.
- Talent Specialist, Collabera Pvt Ltd, Vadodara, India**

May-2021 – Jan 2022

 - Worked as a US IT Recruiter managed entire life cycle of the recruitment process for clients in the US.

EDUCATION

Amravati University, Bachelor of Mechanical Engineering	2019
Vivekanand College of Science, Higher Secondary School	2015

CERTIFICATES

Microsoft Certified: Azure Administrator Associate Credential ID: 26B080808A23A53C	Verify
Microsoft Certified: Azure Fundamentals Credential ID: 48516A86BE774AFF	Verify

AWARDS

- Infosys Techzooka Hackathon: Achieved Runner-Up position.
- Infosys GitHub Codethon: Selected as a Top Finalist.
- Project Recognition: Received appreciation for outstanding project contributions.
- Infosys Tech-Cohere Chapter: Awarded Recognition and Reward (RnR) for successful implementation and demonstration of GitHub Copilot across multiple projects.
